

## NTT launches Hong Kong's first end-to-end Managed Private 5G service to help enterprises unlock the potential of new mmWave technology

*Delivering faster speed, ultra-low latency, and secure connectivity designed for uplink-centric communications to empower enterprise digitalization journey*

**HONG KONG, June 14, 2023** – NTT, a world-leading global technology services provider is the first in Hong Kong to introduce a fully managed private 5G (“P5G”) service, which enables enterprises to build highly secure infrastructure operating on fast data transfer speeds, ultra-low latency, and massive connectivity – an important step towards the city’s digitalization journey.

Introducing the innovative millimeter wave (“mmWave”) technology running on 26GHz to 28GHz spectrum, NTT helps enterprises build a wide-area 5G network to meet the huge demands for uplink-centric and Mission-Critical Push-to-X connectivity (“MC-PTX”). These standout features make it an ideal network for connected devices to transmit information quickly and efficiently at an enterprise level.

The managed P5G service offered under the “[Docomo Business](#)” brand, not only provides enterprises with the backbone infrastructure to deploy ready-to-market Internet of Things (“IoT”) solutions at speed, but also offers fully managed services for ongoing operations and upkeep of the network. As the enterprise business brand launched under NTT Group in 2022, Docomo Business is a world leader in the deployment of 5G open radio access networks (“ORAN”), with an ownership of 10,000+ related patents and a comprehensive portfolio of over 850 5G projects since service launch.

“As a visionary global tech company, NTT has always been a pioneer, allocating huge information and communications technology (“ICT”) investments to Hong Kong for the ongoing benefit of our customers over the years. Bringing Docomo Business to Hong Kong is a strong testament to our confidence in the city’s massive growth opportunities, and solidifies the vision of offering the businesses here an accelerated start to P5G running on true mmWave technology.” **Stephen Tsang, Chief Revenue Officer of NTT Docomo Business** said.

Leveraging our full-service portfolio, NTT helps enterprises develop their purpose-built P5G network from design, build, deployment, solution to operations and on-going management. The service allows a high degree of customisation with ready-to-deploy IoT solutions well-equipped for a variety of industries to address multiple use case scenarios. Aiming to help enterprises embrace the future 5G technologies, NTT assists with plugging in the gaps arising from potential tech talent shortages with their P5G managed services, provided by a team of network experts acting on the best practices.

“We envision our P5G network service to be a springboard for regional and Chinese enterprises to tap into new business opportunities in the Greater Bay area and beyond to global markets. Building on the cross-border synergy between Hong Kong and mainland China will further strengthen the city’s position as a gateway for outbound IoT innovation, establishing it as a robust Innovation and Technology (“I&T”) hub.”

**Stephen** added, “By replicating our success and lessons learned from Japan, we will soon establish a new Cross Lab in Hong Kong to serve as a hotbed for experimentation and implementation of new innovations with an ecosystem of partners that will help conceptualize Hong Kong’s smart city blueprint.”

### **About NTT Group**

The NTT Group is a world leader in providing technology and business solutions to people, clients and communities. With \$108B in revenue and more than 330,000 employees in over 80 countries and regions, providing services in over 190 of them, we are committed to being a long-term trusted partner and always contributing to society through our business operations.

### **About Docomo Business**

Established in 2022, Docomo Business is a new enterprise business brand under NTT Group. Integrated by NTT DOCOMO, NTT Communications and NTT COMWARE, this new DOCOMO group with the brand name of "Docomo Business" takes on the challenge of "changing worlds with you" together with its prestige corporate clients and partners all over the world.

### **About NTT Hong Kong**

NTT is a leading IT infrastructure and services company since its establishment in Hong Kong in 1999. Through technology and innovation, we deliver a secure and connected future that empowers our people, clients and communities. We lay the foundation for organizations' edge-to-cloud networking ecosystem, simplify the complexity of their workloads across multicloud environments, and innovate at the edge of their IT environments, where networks, cloud and applications converge. On the journey towards a software-defined future, we support organizations with platform-delivered infrastructure services.
